- English
- Portuguese (basic)

Expertise

- cPanel
- Web hosting
- Web domain
- VPS
- Databases
- API
- Web development
- Unity development
- Source control
- SSH/FTP

Experience

FS.NET Software - Argentina
2021 - Present

Freelance developer specializing in creating applications for Android, Windows, and MAC using a combination of C#, JavaScript, and SQL/MongoDB within the Unity framework. I have successfully developed a variety of applications, including point of sale systems, appointment booking applications, productivity tools, and more.

Seven games - Chile
2019 - 2022

I was responsible for the development of Aurora, a mobile application that blended augmented reality, video games, and a social network, allowing people to connect with others based on common hobbies. The project, built using Unity, C#, and SQL, was successfully pitched and sold in a shark tank.

FS.NET Hosting - Argentina
2016 - Present

As the owner of a web hosting service, I oversee domains, web pages, cPanel, webmail, and MySQL databases, offering a comprehensive range of services to clients, attracting businesses and individuals worldwide.

Education

Online Courses and Training
2014 - Present

Continuously enhancing my skills through a variety of online courses and training, covering topics such as web development, game development, JavaScript, C#, Unity, React, Node.js, databases and many more.

E.T. N°24 Seconday School
2009 - 2016

Business Administration Technician
