- SSH/FTP

Experience

FS.NET Software - Software Developer
2022 - Present

Freelance developer specializing in creating applications for Android, Windows, and MAC using C#, Monobehaviour and databases. I have successfully developed a variety of applications, including point of sale systems, appointment booking applications, productivity tools, and more.

Aurora Games - Unity Developer
2019 - 2022

I was responsible for the development of Aurora, a mobile application that blended augmented reality, video games, and a social network, allowing people to connect with others based on common hobbies. The project, built using Unity, C#, and SQL, was successfully pitched and sold in a shark tank.

Clouder - Application support
2017 - 2019

I have been responsible for ensuring the functionality and stability of the company's applications, addressing technical issues, providing user support, and managing incidents.

FS.NET Hosting - Owner and Administrator
2016 - 2021

As the owner of a web hosting service, I monitored domains, created sites with WordPress, provided cPanel licenses, offered webmail services, managed MySQL databases, issued SSL certificates, and provided technical support.

Education

Online Courses and Training
2014 - Present

Continuously enhancing my skills through a variety of online courses, certifications, and training, covering topics of all kinds, including but not limited to technology.

E.T. N°24 Secondary School
2009 - 2016

Business Administration Technician
